

2.95% Multi Defender VONTI on Apple, Cisco, Oracle (QUANTO EUR)

Barrier monitoring at maturity

PRODUCT DESCRIPTION

Multi Defender VONTI refer to several underlyings and are characterized upon issue by a nominal value and a guaranteed coupon on the one hand, and, on the other hand, by conditional capital protection. This capital protection ceases to apply as soon as one of the underlyings is at or below its barrier at final fixing. The redemption at the end of the term is determined on the basis of the performance and final fixing of the respective underlyings: If all underlyings close above their barriers at final fixing, redemption is at the nominal value. If at least one of the underlyings closes below its barrier at final fixing, the number of underlyings is delivered with the poorest performance or a cash compensation is paid (for details see "Redemption/delivery")

PROSPECTS OF PROFIT AND LOSSES

Any possible gain results from the guaranteed fixed coupon. Nevertheless, there is an upper limit to the gain as a maximum of the nominal value plus the coupon is paid.

These products have only conditional capital protection defined by the individual barriers: If at least one underlying touches or breaches its barrier at final fixing, this conditional capital protection ceases to apply. Accordingly, the risks of an investment in a Multi Defender VONTI are considerable; given upwardly limited chances of gains, they correspond largely to the risks of a direct investment in the underlying with the poorest performance. The lower the closing price of the underlying with the poorest performance after falling below its strike price, the greater the losses sustained. In extreme cases (with a closing price of the underlying of zero), the maximum loss can lead to a loss of the capital invested.

Even if the performance of the underlying is positive, the price of the product during the term can be considerably below the issue price. Potential investors should bear in mind that price changes to the underlying, as well as other influencing factors, may have a negative effect on the value of structured products.

SIGNIFICANT RISKS FOR INVESTORS

Currency risks

If the underlying or underlyings is/are denominated in a currency other than the product's reference currency, investors should bear in mind that this may involve risks due to fluctuating exchange rates and that the risk of loss does not only depend on the performance of the underlying(s) but also on any unfavourable performance of the other currency or currencies. This does not apply for currency-hedged products (quanto structure).

Market risks

The general market performance of securities is dependent in particular on the development of the capital markets which, for their part, are influenced by the general global economic situation as well as by the economic and political framework conditions in the respective countries (so-called market risk). Changes to market prices and interest rates, prices of raw materials or corresponding volatility, can have a negative effect on the valuation of the underlying or product.

Issuer risk

The value of structured products may depend not only on the performance of the underlying, but also on the creditworthiness of the issuer/guarantor, which can change during the term of the product. The investor is exposed to the risk of default of the issuer/guarantor. For further information on the rating of Vontobel Holding AG or Bank Vontobel AG, please see the TERMS AND CONDITIONS RELATING TO STRUCTURED PRODUCTS.

Publication of notifications

All notifications to investors concerning the products and amendments to the product terms (e.g. due to corporate actions) are published at www.derinet.ch. In addition, the information concerning products listed on the SIX Swiss Exchange is published in accordance with the provisions valid for IBL (internet-based listing) at www.six-swiss-exchange.com.

Classification

In Switzerland, these financial instruments are considered structured products. They are not collective investment schemes within the meaning of the Swiss Federal Act on Collective Investment Schemes (CISA), and are therefore not subject to the regulations of the CISA or the supervision of the Swiss Financial Market Supervisory Authority FINMA.

Restrictions on sales

U.S.A., U.S. persons, UK, EEA, Dubai (UAE).
